

FOR IMMEDIATE RELEASE

Equis Commissions 13.8 MW Solar Project in Aomori Prefecture, Japan

Singapore, 9 October, 2017 – Equis Energy (Equis), Asia-Pacific’s largest renewable energy IPP, has commenced selling power on a 13.8 MW solar project in Noheji town in Aomori Prefecture, Japan.

In Japan, Equis owns 40 projects comprising 0.9 GW and has a further 1.3 GW under development. At its regional headquarters in Tokyo and local offices in Shichinohe, Kasama and Fukushima, Equis employs over 60 professionals well-versed in development, design, project management and investment.

Adam Ballin, Representative Director, said, “Japan’s commitment to renewable energy has broad popular support across the nation, and Equis has forged especially strong ties to the community in the Aomori area, where we have a portfolio of 10 operational and under-construction solar projects that have an energy generation capacity of over 170 MW. Not only do these projects provide low-cost clean energy, but also they allow us to offer jobs to the community.”

The Noheji project will generate 33,925 MWh of energy per annum and on an annual basis, provide 5,729 households with electricity, save 16,652 tons of CO₂ as well as 28 million liters of water.

About Equis Energy

Equis Energy operates from 15 Asian offices, employing 302 professionals including 100 engineers and 38 local development professionals. Equis is the largest renewable energy IPP in the Asia-Pacific region based on installed capacity and owns 105 renewable energy assets, totaling 4.9 GW across Australia, India, Indonesia, Japan, the Philippines, Taiwan and Thailand. In addition to its current portfolio of 4.9 GW, Equis has a further 75 assets and 6.2 GW under development.
